NACE RESEARCH STAFF

DIRECTOR OF RESEARCH AND PUBLIC POLICY: Mary Gatta, Ph.D.

ASSOCIATE DIRECTOR OF RESEARCH AND PUBLIC POLICY: Joshua Kahn, Ph.D.

SENIOR RESEARCH MANAGER: Andrea J. Koncz

RESEARCHER: Angelena Galbraith

RESEARCHER: Mabel Sabogel, Ph.D.

RESEARCH COORDINATOR: Anna Longenberger

About the National Association of Colleges and Employers

Established in 1956, the National Association of Colleges and Employers (NACE) is the only professional association in the United States that connects more than 13,000 college career services professionals, more than 3,800 early career talent acquisition professionals, and more than 400 business solution providers that serve this community. NACE is the premier source of market research on career readiness, the employment of recent college graduates, and the college-to-career transition. NACE forecasts hiring and trends in the job market; tracks salaries, recruiting and hiring practices, and student attitudes and outcomes; and identifies best practices and benchmarks.

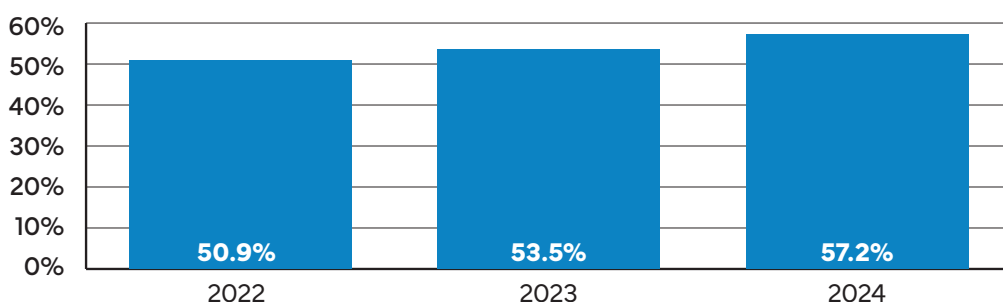

HIGHLIGHTS

HIGHER EDUCATION MAKES A DIFFERENCE: GRADUATES BELIEVE THEIR INSTITUTIONS HAVE PREPARED THEM FOR THE NEXT STEP IN THEIR CAREER.

- In fact, 57% of graduating seniors said their institution prepared them very or extremely well to enter the workforce or to pursue additional education—up from 51% of 2022 graduates, which was the first group NACE asked. **(See Figure 1.)**
- The increase could reflect an increase in institutions' focus on career outcomes. [A 2024 study conducted among faculty by NACE, AAC&U, and SEE found that 80% integrate career readiness and career information into their classes.](#) In addition, NACE's 2023 Career Services Benchmarks study found that nearly three-quarters of colleges have implemented career readiness competencies on their campus.

HIGHLIGHTS

THE CLASS OF 2024 FACED A TOUGHER JOB MARKET THAN THEIR RECENT PREDECESSORS.

- Class of 2024 graduates saw less demand from employers than their 2022 and 2023 counterparts, who experienced robust post-pandemic hiring. The fall off in demand, projected in NACE’s [Job Outlook 2024 Spring Update](#) survey, can be seen in shifts in job applications as well as job offers.
- 2024 graduates cast a wider job-search net than their predecessors: Overall, they submitted an average of 22 job applications before graduating, up from 17 for 2023 graduates.
- Despite submitting more applications, they garnered fewer offers. Less than half—45%—received a job offer before graduating, down from 56% of 2023 graduates and 54% of 2022 graduates.
- In addition, the average number of job offers also fell—from 1.13 for the Class of 2023 to 0.83 for the Class of 2024. (See Figure 2.)

HIGHLIGHTS

IN THE JOB SEARCH, PAID INTERNS OUTPERFORMED GRADUATES WHO UNDERTOOK UNPAID INTERNSHIPS OR DIDN'T DO AN INTERNSHIP.

- As has consistently been the case over the last several years, on average, paid interns had more job offers pregraduation than unpaid interns and non-interns.
- Paid interns also enjoyed a higher average starting salary than unpaid interns and non-interns.
- Also signaling a tougher job market: Overall, approximately 32% of 2024 graduating seniors who took part in internships reported receiving job offers from their internship employers, down from approximately 36% of 2023 graduates.

AVERAGE NUMBER OF JOB OFFERS / STARTING SALARY

N=1,137 / 480

1.01 /
\$68,041

PAID INTERNS

0.66 /
\$53,125

UNPAID INTERNS

0.74 /
\$55,924

NON-INTERNS

NON-INTERNS DID BETTER THAN UNPAID INTERNS?

WHY?

MOST LIKELY, THE DRIVER IS MAJOR: APPROXIMATELY ONE-THIRD OF THOSE WHO SELF-IDENTIFIED AS UNPAID INTERNS WERE PUBLIC SERVICE MAJORS, WHICH IS AMONG THE LOWEST-PAID MAJORS.

HIGHLIGHTS

STUDENTS RECOGNIZE THE VALUE OF INTERNSHIPS: THE PERCENT OF GRADUATING SENIORS WHO PARTICIPATED IN AN INTERNSHIP IS THE HIGHEST THAT NACE HAS RECORDED IN THE PAST SIX YEARS.

- More than two-thirds of 2024 graduating seniors engaged in an internship experience during their college career, up from around 61% of 2023 graduates and outpacing prepandemic 2019 graduates (64.6%). (See Figure 3.)
- Overall, 57% of interns reported that they were paid for their internship. That’s down some from 2023, when 59% were paid, but as Figure 4 shows, the overall trend is toward paid internships.

FIGURE 3:
Took part in an internship during college career (graduating seniors)

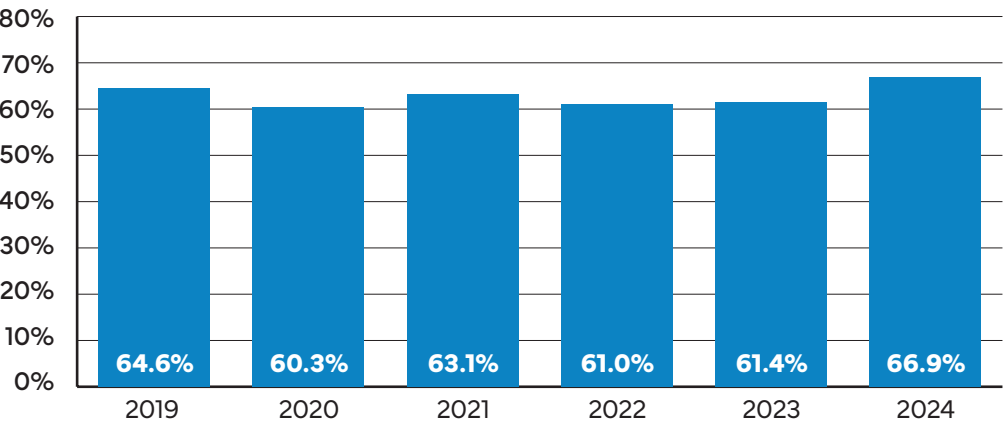

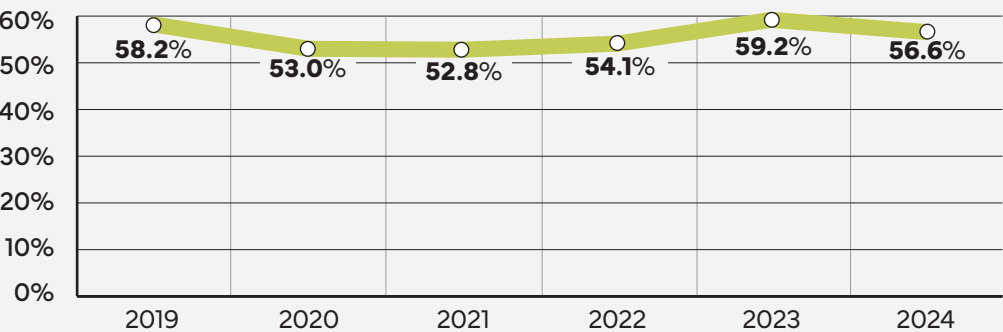

FIGURE 4:
Percent of interns who were paid (graduating seniors)

HIGHLIGHTS

AND, THERE’S MORE EVIDENCE THAT STUDENTS RECOGNIZE THE IMPORTANCE OF GAINING EXPERIENCE.

- Although internships were the most popular type of experiential education, 2024 graduates reported engaging in a wide range of experiences. Overall, 84.5% of the class took part in some form of experiential learning—a big jump from the 71% who reported this in 2021. (See Figures 5 and 6.)

FIGURE 5:
Percent of graduating class participating in experiential learning

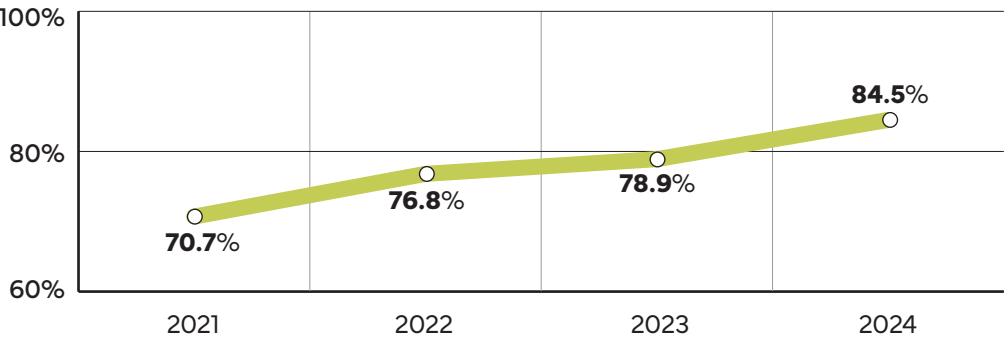

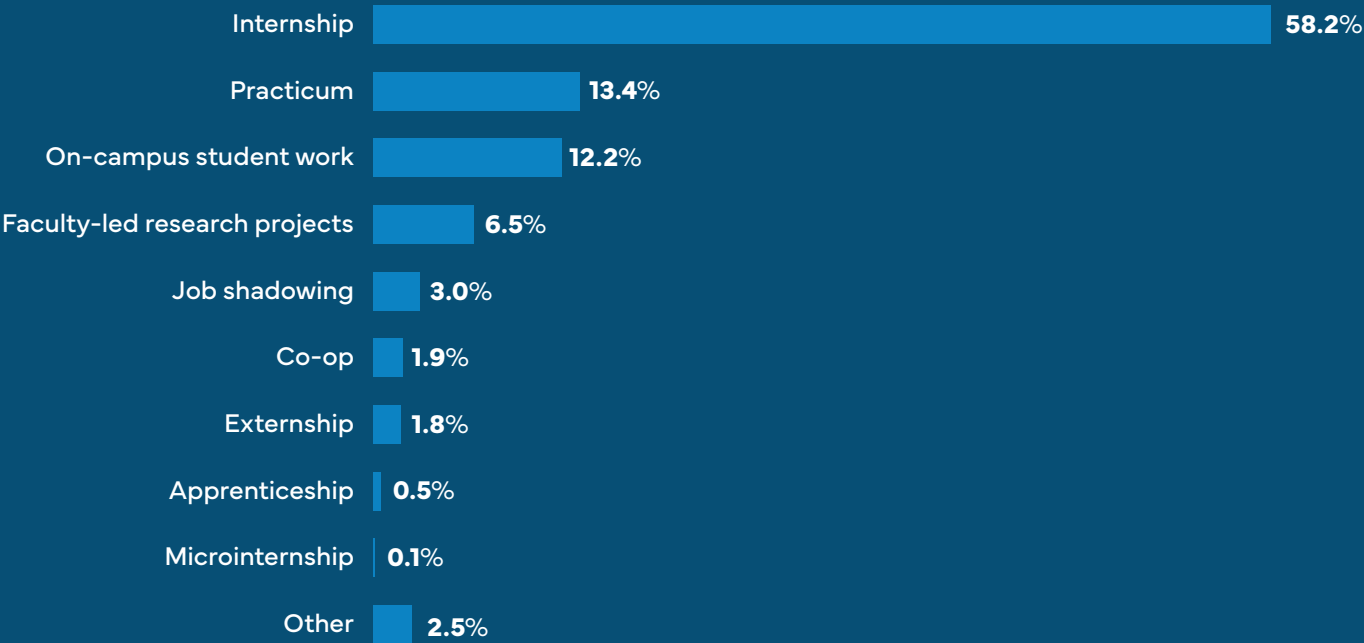

FIGURE 6:
Distribution of experiential learners (graduating seniors)
RESPONDENTS=1,728

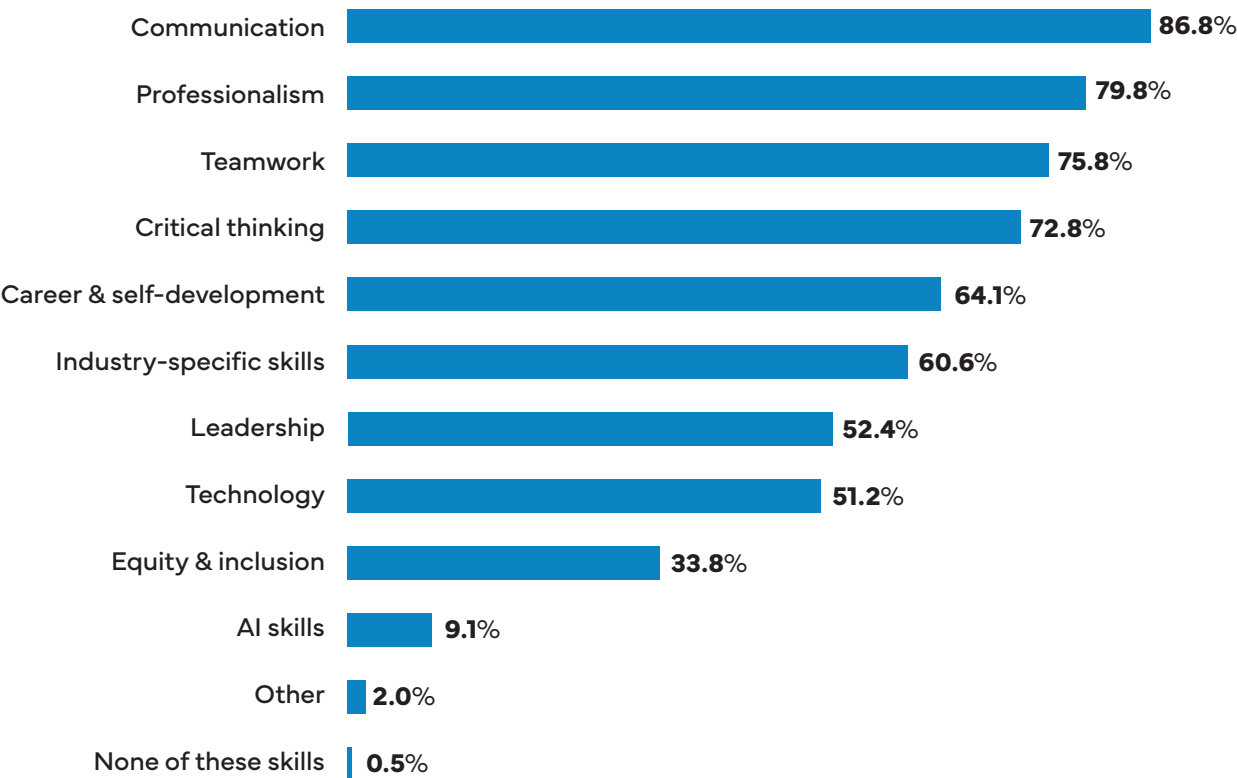

HIGHLIGHTS

STUDENTS BELIEVE THEIR EXPERIENCE HAS HELPED THEM IMPROVE IMPORTANT SKILLS.

- More than three-quarters of graduating seniors taking part in experiential learning reported that their most recent experience improved their communication, professionalism, and teamwork skills/competencies. (See Figure 7.)
- Less than 10%, however, felt they improved their artificial intelligence (AI) skills, posing an opportunity for institutions and organizations to work together to build such skills into internships and other experiences.

FIGURE 7:
Competencies gained through experiential learning
RESPONDENTS=1,720

> SEE THE “EXPERIENTIAL LEARNING” SECTION FOR ADDITIONAL FIGURES.

> **USE THE DASHBOARD** TO FILTER THE DATA BY MAJOR, GENDER, ETHNICITY, AND MORE.

HIGHLIGHTS

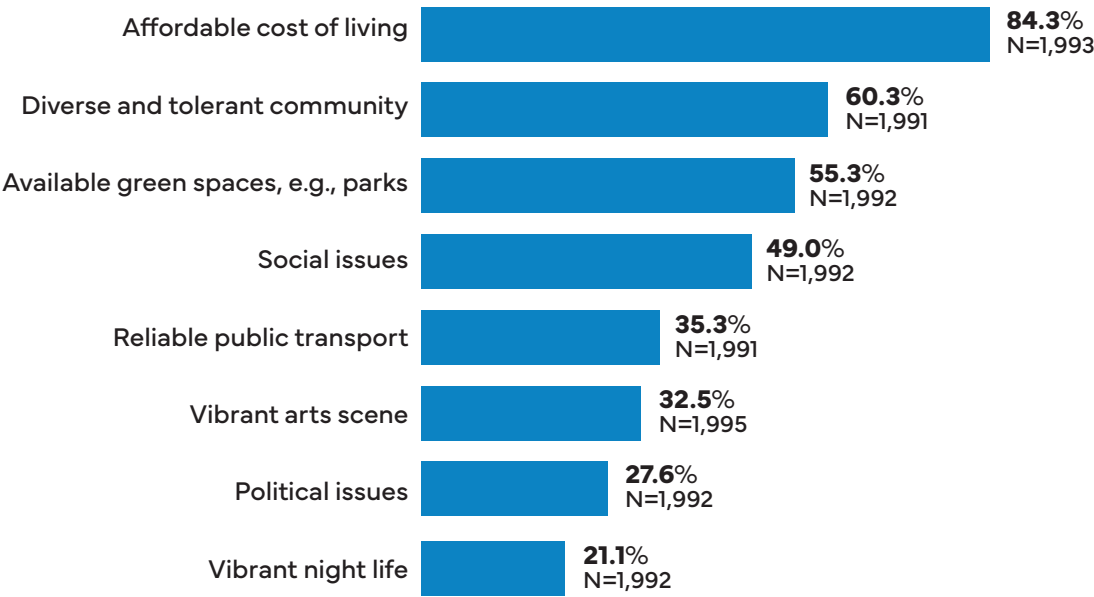

GRADUATES SEEK SECURITY IN THEIR JOB AND EMPLOYER.

- More than three-quarters of 2024 [graduates cited job security as the key attribute of a job and employer](#). Nearly as many identified a “healthy workplace culture” as important.
- Graduates' desire for security also manifests in the job benefits they identified as most important: Annual salary increases, a company-matched 401(k), and medical and dental insurances topped their wish list.
- Graduates also expressed a preference for employers that are transparent about their salaries and benefits.

COST OF LIVING IS THE KEY DRIVER IN GRADUATES’ WILLINGNESS TO RELOCATE.

More than 84% of graduates identified cost of living as the factor determining their willingness to relocate for a job, far outpacing other considerations, such as the nature of the community, night life, and public transportation. This aligns with their quest for security.

FIGURE 8:
Importance of factors in decisions to relocate

KEY ATTRIBUTES IN A JOB/EMPLOYER

APPENDIX

ABOUT THE 2024 STUDENT SURVEY REPORT

Each year, the National Association of Colleges and Employers (NACE) surveys college students across the country about their experiences, behaviors, attitudes, and preferences as they relate to career development, the job search, and employment. Data for the *2024 Student Survey Report* were collected from March 13, 2024, through May 15, 2024.

In all, 20,955 students responded from 253 colleges and universities. Of those, 2,281 were Class of 2024 graduating seniors at the bachelor’s degree level.

Please note:

- Most of the data provided in the report reflect responses from graduating seniors, but there are instances in which the data reflect the responses of all undergraduate responses. The relevant respondent pool is noted.
- Percentages are calculated on the number of responses to the specific question.

FIGURE 38:
